DID YOU KNOW?

The namesake of the resort is the 1st Century Roman Bridge (Puente Romano). The bridge was built in the first century and is a remaining structure of the ancient road that once linked Cadiz with Rome. Today it is surrounded by elegant bars & restaurants, which make up the resort's Plaza Village

The Plaza Village features an enchanting open air terrace during the summer and a covered terrace during the winter

The 55,000 sq.m of lush subtropical gardens feature over 400 botanical species of plant life, which have been brought to the gardens from all over the world

Guest rooms and suites feature Mediterranean inspired designs by acclaimed English designer Andrew Martin, with each room offering views of either the resort gardens or the Mediterranean sea from their private terraces. Some suites feature bathrooms with Jacuzzi as well as a terrace with a private Jacuzzi

Launched by Bjorn Borg and developed by Manolo Santana, The Tennis & Fitness Club has a main court seating over 2000 spectators and the club has played host to international tournaments and concerts

The resort has made efforts to decrease its carbon footprint and increase green initiatives by replacing its fuel boilers with organic olive stone feed and renovating the legendary Swan Lake with a new waterproof layer and pumping system and more

The resort opened Spain's first Nobu Restaurant on 15th June 2017
